SUMMARY

Senior Full-Stack Software Engineer with 6+ years of experience designing and building scalable web and mobile applications. Strong focus on backend development with Node.js and microservices architectures, delivering high-performance and resilient systems in production environments.

Proven experience working on international projects, including high-traffic platforms, with a strong emphasis on system design, scalability, and reliability. Skilled in building distributed systems, integrating third-party services (payments, APIs, CRM), and developing cross-platform applications.

Comfortable working across the full development lifecycle, from architecture design to production deployment, in fast-paced and technically demanding environments.

EXPERIENCE

Senior Full-Stack Software Engineer

NTT DATA Europe & Latam

10/2024 - 04/2026

Casablanca, Morocco

- Key Contributions:**
- Contributed to the development of distributed systems for international clients, including **Arsenal Football Club**, handling performance and scalability constraints.
 - Designed and developed backend services using Node.js within a microservices architecture.
 - Participated in building an event-driven architecture (Azure Service Bus / Event Grid) to improve system resilience and inter-service communication.
 - Implemented and maintained GraphQL APIs (Apollo Federation) to aggregate data across multiple services.
 - Collaborated with international teams in agile environments, ensuring code quality, security, and performance standards.

Freelance Senior Full-Stack Software Engineer

Consortium Members

01/2025 - 03/2025

Marrakech, Morocco

- Key Contributions:**
- Designed and developed a VIP-focused platform with advanced user management and personalized service features.
 - Built a Node.js backend architecture with REST APIs and third-party service integrations.
 - Developed a mobile application enabling premium service access and client interaction management.
 - Implemented secure features for handling sensitive user data and payment-related workflows.
 - Designed a scalable system allowing new services to be added without major architectural changes.

Freelance Senior Full-Stack Software Engineer

Easy Trip

10/2024 - 01/2025

Marrakech, Morocco

- Key Contributions:**
- Designed and developed a REST API middleware connecting an existing website to a CRM, improving client and operations management.
 - Developed cross-platform mobile applications for iOS and Android using React Native.
 - Integrated third-party services including Stripe and CRM APIs, and implemented automated workflows using webhooks.
 - Built a lightweight and scalable backend architecture adapted to a growing business structure.
 - Managed the full project lifecycle independently, from architecture and development to deployment.

SKILLS

- Full-Stack Development (Node.js, React, Next.js)
- Mobile Development (React Native - iOS & Android)
- Architecture Design (Microservices, Distributed APIs)
- Backend Development & REST / GraphQL API Design
- Third-Party Service Integration (Payments, CRM, APIs)
- Databases (MongoDB, MySQL)
- Cloud & DevOps (AWS, Azure, Docker, CI/CD)
- Application Security (OWASP best practices)

TECHNOLOGIES

- Backend :**
- Node.js · Express · GraphQL
- Frontend :**
- React.js · Next.js
- Mobile :**
- React Native
- Databases :**
- MongoDB · MySQL
- Cloud :**
- AWS · Azure
- DevOps :**
- Docker · CI/CD
- Security :**
- JWT · OAuth2 · OWASP
- Tools :**
- Git · GitHub · GitLab · Postman · Swagger · Jira · Confluence

EXPERIENCE

Freelance Senior Full-Stack Software Engineer

06/2022 - 09/2024

Beebs

France

- Key Contributions:**
- Designed and developed the platform from the ground up, including backend, frontend, and overall system architecture.
 - Built a scalable microservices architecture to support a high volume of users and transactions.
 - Developed robust backend APIs using Node.js and managed database design and data flows.
 - Integrated third-party services for payments, delivery, and business workflow orchestration.
 - Developed web and mobile applications with a strong focus on performance and user experience.
 - Contributed to a platform supporting rapid growth and a significant volume of users and transactions.

Freelance Senior Full-Stack Software Engineer

03/2020 - 05/2022

HiHello

Quebec, Canada

- Key Contributions:**
- Developed backend and mobile features around secure NFC communication.
 - Implemented encryption and decryption mechanisms to protect data exchange between devices.
 - Contributed to iOS and Android mobile application development using React Native.
 - Participated in improving system performance and real-time reliability.
 - Collaborated on backend integrations for processing and validating user data.

Junior Full-Stack Developer

07/2019 - 02/2020

PGK Digital Networks

Marrakech, Morocco

- Key Contributions:**
- Contributed to the development of an internal CRM system for customer and sales management.
 - Implemented backend features using Laravel and managed MySQL database operations.
 - Helped improve system performance and reliability.
 - Worked with teams to translate business requirements into practical technical solutions.

Junior Backend Developer

01/2018 - 03/2019

Barid Bank

Marrakech, Morocco

- Key Contributions:**
- Developed a biometric attendance and access control system.
 - Integrated the system with fingerprint scanning devices.
 - Built backend processes for data management and security.
 - Provided maintenance and technical support for the production system.

EDUCATION

- Specialized Technician Diploma in Software Development

2016 - 2018

I.S.G.I
- Specialized Technician Diploma in Graphic Production

2012 - 2014

I.S.G.I
- High School Diploma in Life and Earth Sciences

2011 - 2012

Lycée Sidi Abderrahmane
